## Hotel Security need advise

Posted by JM Maher - 2009/07/10 13:14

---

Hi i was wondering if someone could please advise me on what type of cameras and system would be suitable for a hotel. The hotel will consist of :

- 1 restaurant, (1 POS needed)
- 1 wine bar (small)(1 POS needed)
- 1 regular bar,(1 POS needed)
- 1 rooftop(outdoor)bar and lounge, (2 POS needed)
- 2 kitchens,
- 1 reception(1 POS needed)
- 1 gym/spa(1 POS needed)
- 1 Store/refrigeration room
- 1 Elevator

Plus 5-6 cameras dispersed around the common areas etc.

Thank you in advance for any assistance at all.

Our budget is approx. \$3000-\$3500

Jen

No problem, I have just a few questions before I get that quote together for you:

- When you say "1 restaurant (1 POS needed)" or "1 wine bar (1 POS needed)," do you mean that you have a total of two cameras in those areas (one doing a general shot, one on the POS) or is there just a single camera, over the POS?
- Was the elevator camera meant to be in the elevator itself or just watching the doors?
- Are the common area cameras going to be inside or outside? If both, how many of each?

Please advise and we'll be able to go from there. If it's easier, you can also catch me over the phone in my office at 800.291.0523 ext 134.
