
DVR not showing color

Posted by ModFreak - 2008/12/09 02:45

Hi,

Anyone ever faced the DVR not producing color? My PC based and some stand-alone DVR is not showing color but on some it shows, any fix for this kind of scenerio?

Thanks

=====

Hello,

Did your system show color, then stop showing color? Does it show color during the day but not at night? How many cameras do you have... are they all color cameras? Do any of your cameras have IR emitters?
